Udupi, India

/sneha-y-v

/snehayv-1998

## TECH STACK

Java8

Spring Boot

MongoDB

Git

MySQL

REST APIs

Kafka

Spring Framework

Spring

Spring Data

Spring MVC

Jpa

Hibernate

## LEARNING

Docker

K8s

## EDUCATION

BE in Computer Science

July 2016 – Aug 2020

- GPA: 7.83

## PUBLICATIONS

Prediction of Network Congestion using Machine learning |

## CERTIFICATES

Dockers and K8s |

MongoDB |

## ABOUT ME

I'm a passionate Java and Spring Boot developer with 3+ years of hands-on experience in building robust and maintainable applications.

## CAREER EXPERIENCE

My expertise includes:

- Designing and implementing RESTful APIs that deliver high-performance and secure data communication.
- Proficiency in Java Spring Framework, including Spring Boot, Spring Data, and Spring Security, to develop feature-rich and scalable backend systems.
- Strong database management skills, with hands-on experience in SQL and NoSQL databases such as MySQL, and MongoDB.
- Payment Gateway Integration for different pay mode like RTGS, eMandate, UPI, Net-banking.
- Collaborating with cross-functional teams to deliver end-to-end solutions, from requirement analysis to deployment and maintenance.
- A strong commitment to writing clean, well-documented code that adheres to coding standards and is easily maintainable.
- Staying up-to-date with emerging trends in backend development and continuously improving my skills to deliver cutting-edge solutions.

## WORK EXPERIENCE

Software Engineer | Robosoft Technologies

Sep 2020 – Present

Udupi, India

## PROJECTS

Axis Mutual Funds |

Sep 2020 – Present

This platform was designed to cater to various types of investors, including new and first-time investors who had completed the KYC verification process, as well as existing investors. Our primary goal was to empower users to make investments conveniently and securely at any time and from anywhere.

My work included:

- Implementing crucial micro-services like Authentication, Transaction, and Notifications.
- Handling significant user stories, including Payment Gateway Integration (RTGS, eMandate, UPI, Netbanking) for secure transactions.
- Contributing to features such as Penny Drop, Goal Planning, Login, Transactions, Goal Tracking, Leads, Knowledge Center and Signzy integration for online KYC.

Technology used:

- Java8, Spring Boot, MongoDB, Git, MySQL, REST APIs, Kafka, Spring Security, JUnit, Mockito, Spring Data, Jpa, Hibernate, Docker and K8s
